

### Who are we?

Dear Customer,

Data: 17-05-2010

This newsletter aims to keep you up to date about the latest achievements of E.S.Tech in the field of H<sub>2</sub>O<sub>2</sub> vapour bio-decontamination.

**H<sub>2</sub>O<sub>2</sub> vapour** is employed for the bio-decontamination of clean rooms and production processes in the pharmaceutical sector and food industries. Its well-known anti-microbial power against viruses and bacterial spores ensures high levels of hygiene and air quality in manufacturing departments and research laboratories.

**H<sub>2</sub>O<sub>2</sub> vapour** is widely compatible with most of the material present inside the laboratories; furthermore, its by-products are water and oxygen, innocuous residues already present in the environment.

**E.S.Tech** develops and manufactures H<sub>2</sub>O<sub>2</sub> vapour generators for clean rooms and biosafety hoods bio-decontamination.

**E.S.Tech** technology allows you to bio-decontaminate the clean room as well as the HVAC system that supplies the clean room, all at the same time.
